

Premium Surgical Hemostatic Forceps

The Premium Surgical Hemostatic Forceps are precision-engineered instruments designed for superior control and durability in medical procedures. Manufactured from high-grade stainless steel, they offer excellent corrosion resistance and long service life. Gold-plated ergonomic finger rings provide enhanced grip and comfort, while the finely serrated jaws ensure secure clamping.

Key Features

- High-grade stainless steel construction
- Gold-plated ergonomic handles
- Precision serrated jaws
- Multi-position ratchet locking mechanism
- Autoclavable and corrosion-resistant
- Reusable and easy to maintain

Applications

- Clamping blood vessels
- Tissue handling
- General surgical procedures
- Clinical and laboratory use

Technical Specifications

Material	Stainless Steel
Finish	Polished / Gold-plated handles
Sterilization	Autoclavable
Usage	Reusable
